

EMERGENCY RESPONSE TEAM TRAINING

PREMIUM ALL-IN-ONE ELITE COMPLIANCE PROGRAM

In today's fast-paced corporate and industrial environments, emergency readiness is a critical pillar of safety. This **Ultimate Safety & Response Certification** condenses five core life-safety disciplines into an intensive, single-day, hands-on 8-hour agenda to build an elite, immediate responder workforce.

KEY PROGRAM BENEFITS

- **Minimal Operational Downtime:** Consolidate annual regulatory training obligations into a single day rather than interrupting separate production shifts.
- **Turnkey Convenience:** A fully mobile training center brings all advanced medical mannequins, AED trainers, barrier masks, and pressurized oxygen cylinders straight to you.
- **Verified Compliance:** Instantly receive accredited credentials.

VALIDATED CREDENTIALS ISSUED

CPR, AED, First Aid, & Emergency Oxygen: Validated 2-Year Certification

OSHA Bloodborne Pathogens (BBP): Validated 1-Year Certification

FLEXIBLE DELIVERY FORMATS

100% On-Site Tracking

Lectures, multimedia instructional guides, and physical drills are completed sequentially on-site at your company facility.

Blended / Hybrid Track

Cognitive material is completed independently online beforehand. Instructional teams meet on-site solely for physical skill checks and practical scenario testing.

8-HOUR OPERATIONAL SYLLABUS

MODULE 1: CPR & AED ESSENTIALS

CHECK—CALL—CARE action steps, compressions (100–120 BPM), proper depth, rescue breaths via mask barriers, rapid AED deployment, team rescue dynamics, and choking relief.

MODULE 2: ADVANCED TRAUMA & FIRST AID

Spinal/joint stabilization and rigid/soft splinting. Severe bleeding control using direct pressure and combat tourniquets. Managing medical emergencies (strokes, seizures, EpiPens, Narcan).

MODULE 3: OSHA BLOODBORNE PATHOGENS

Exposure Control Plans, pathogen deep-dive (HBV, HCV, HIV), PPE donning/doffing drills, regulated sharps waste protocols, and live biohazard spill cleanup sequencing.

MODULE 4: EMERGENCY OXYGEN ADMINISTRATION

Anatomy of cylinders and flowmeters. Setup for Non-Rebreather Masks, Simple Masks, Nasal Cannulas, Bag-Valve Masks (BVM), and Demand Valves. Pulse oximetry tracking.

GROUP TRAINING PACKAGES

Small Corporate Group

Designed for 5–9 Personnel

Training Only: Complete training credentials distributed per student for immediate field deployment.

Turnkey Compliance Tier: Complete credentials + 1 Personal Rapid-Response Trauma Kit provided to each student.

Large Corporate Department

Designed for 10–15 Personnel

Training Only: Full compliance safety training credentials for up to 15 personnel.

Turnkey Compliance Tier: Full training credentials for up to 15 workers + 1 Large Industrial Wall-Mountable OSHA First Aid Station + 2 Mobile Bleeding Control Kits.

Enterprise / Multi-Site

Designed for 16+ Personnel

Customized group shift planning, multi-day coordination logistics, or dedicated recurring annual corporate safety contracts tailored to organizational needs.

SPECIALIZED HARDWARE (A LA CARTE)

Personal Rapid-Response Trauma Kit

Best For: Field operators, remote supervisors, or vehicle boxes.

Includes Combat Application Tourniquet (C-A-T), 4" Israeli Emergency Trauma Dressing, compressed packing gauze, BBP-rated Nitrile gloves, heavy-duty trauma shears, utility marker, and high-visibility MOLLE carry pouch.

Comprehensive OSHA Workplace First Aid Station

Best For: Central break rooms, active warehouse floors, and main offices.

Industrial, wall-mountable metal cabinet meeting ANSI/OSHA frameworks. Stocked with multi-size fabric/plastic bandages, burn relief dressings, medical antiseptic wipes, eye-wash kits, CPR face shield, cold compresses, and surgical tapes.
